GDC Glue Disk Check

Sensor GDC100 for checking glue disk

Glue Disk Check

Side seam gluing is the fundamental job in straight line folding box production process where disk gluing is the well-known standard. Straight line cartons run at highest machine speed and Glue Disk Check becomes indispensable not only because of customer requirements, but also because over-glue and under-glue immediately result in huge waste production. With the KAS Glue Disk Check sensor GDC100 your disk gluing is under strongest quality assurance, misglued cartons are detected immediately and waste production belongs to the past.

Mechanical dimensions of GDC100

Technical changes and errors are subject to change

TECHNICAL DATA	measuring width	measuring slot	measuring principle	operating voltage	output signal	start signal output
DGC100	6 mm	~5 mm	microwave	24 VDC	0 .. 10 V	24 V low active
